

A super-sized men's potency supplement...

- **1000% Stronger**
- **30% Faster...**
- **Better than anything you've EVER tried!**

Big Bubba is rocket fuel for your erection!

For the biggest damn erection possible!

Hi, I'm Larry Berman, co-founder and president of NatureCast, designers and manufacturers of some of the best alternative natural health remedies and supplements in the country.

I have to tell you this is the most exciting letter I've ever written. Because my team has just created the biggest... baddest potency supplement ever made!

In a minute, I want to tell you about this amazing new product, Lexitrol A-12 — around the office we lovingly refer to it as Big Bubba. But first, I'd like to share something with you...

How would you like to have:

- Earth shattering sex
- The biggest erection humanly possible
- And the sexual stamina to rock any woman's world?

Of course you would! Me too. But there was just one problem...

When I wasn't looking I became middle-aged!

That by itself wasn't so much the problem. It was what came along with the receding hairline and the gray.

I no longer had energy... my desire for sex was vanishing... my erections

Over, please...

Up to 1000% more potent than the erection booster you're using now!

Better than ANYTHING you've tried before!

were weak and half the size they were just 10 years ago... and, I'm embarrassed to admit it but, sometimes I couldn't get "it" up at all!

I tried **everything**, even prescription drugs, and nothing worked for me.

Since I owned my own natural supplement business, I called all of my people together. And, without admitting whose problem we were talking about, I challenged them to come up with the fastest working... strongest... best erection enhancer **ever** made!

I told them to spare no expense. Use the best possible ingredients — all at their maximum allowable dosages.

If you want a monster erection, you need a monster pill!

Three months later my people came to me with their new formulation. But there was just one problem. It was so potent it was going to have to be the size of a 9-volt battery — twice the size of the average pill.

But then Dr. Silk came to me and said, "It's no problem — we made it a chewable."

I smiled and said, "Let's do it!" — and that very night, I took it. Just an hour after taking my first dose, my wife couldn't understand what happened. I was like a teen-ager again!

I had set out with the mind-set that this was going to be cutting-edge, the proverbial 5000 lb.

bunker buster of men's potency supplements... my team really came through for us!

Introducing Big Bubba — The heavyweight champion of men's potency supplements!

Big Bubba was designed specifically for **any** man that has ever suffered from diminishing sexual desire or who wants to improve his sexual function.

Big Bubba is not just big. It's powerful! Listen, Big Bubba is so big and powerful, the truth is, it's not for everyone.

When I took Big Bubba the first time, my wife was shocked. She couldn't understand how my penis got *so* big. After three rounds of sex like we hadn't had since our first time together, we both conked-out and slept for ten hours!

Look, all I'm saying is that I warned you fair-and-square. Make sure that, if you're going to take Big Bubba, you're not planning on a quickie because you'll be able to go all night if you want to.

(Please note: Because Big Bubba is 100% natural, it has no side effects that prescription medicines may have. But, if your erection lasts longer than 4 hours, please consult your doctor just to be safe.)

It's about time somebody "super-sized" men's potency supplements!

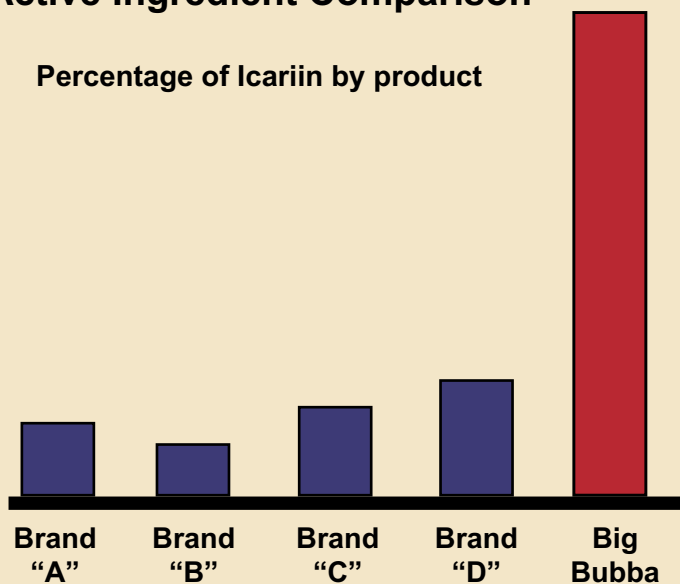

As we get older there are 2 factors working against us men that make it almost impossible for us to have a fulfilling sex life.

The first is a lagging libido. I'm sure you can remember the days when having sex 3-4-5 times a day seemed common place. But as we get older our capacity for sex diminishes rapidly. Before you know it, sex turns into a distant memory...

The Best Solution: Epimedium, a medicinal herb that's used as an aphrodisiac and treatment to improve men's sexual function¹ dates back to at least 400AD and has just recently started turning heads here in the U.S.

Active Ingredient Comparison

Percentage of Icariin by product

Big Bubba contains only the purest, most potent form of Epimedium available.

It delivers a concentrated average of 4 to 10 times more of the active ingredient, Icariin, to you than the other male erection enhancers on the market.

Chances are, Big Bubba is 1000% more potent than the product you're using now.

For centuries it's been used by men throughout Asia to increase sexual stamina and hardness of the penis when aroused. It's also been widely prescribed as an effective energy booster.² Perfect for re-kindling your sexual furnace.

1000% Stronger!

There's always a catch though. You see, most high-end erection enhancers on the market already contain epimedium. But the problem is the vast majority only contain weak doses of the active ingredient, Icariin.

Not Big Bubba, though — it contains only the purest, most potent form of epimedium available, delivering to you a concentrated average of 4 to 10 times more of the active ingredient, Icariin, in each and every dose!

In plain English, that works out to a formula that's up to 1000% more potent than the erection booster you're using now!

This is something to remember *anytime* you're looking at the label on your potency supplement (or any other supplement) — it's not the just the quantity of ingredients in milligrams it has but the percentages of the **active ingredients**.

Plus it's much faster!

The second, and in my mind, the most disturbing side-effect of aging that's keeping

you from having an amazing sex life is a lowered sexual performance. I know I've suffered from a wimpy, soft erection, or a complete lack of an erection altogether, on more than one occasion and, perhaps, you have too.

The Best Solution: Puncturevine, a medicinal herb that's been used for centuries in India and China to maximize and revitalize men's erections and increase our natural production of testosterone.³

Now available in the U.S., Puncturevine has been grabbing some major attention recently among body builders and athletes. Its natural properties mimic those of anabolic steroids, but *without* the negative side effects!

Just the love tonic you need to bring out that Sexual Olympian that's inside of you!

Spine tingling sex that lasts all night long — or as long as you want!

A properly formulated potency formula will contain about 200 mgs. of Puncturevine (which is exactly what Big Bubba has) to boost your testosterone levels and maximize your erections.

So on the surface, other products and Big Bubba would appear to offer similar results. But when

Over, please...

it comes to *real* results there's a **huge** difference between Big Bubba and the "little" guys!

If you take a quick look at the active ingredients — Big Bubba has 20 times the active ingredient found in Puncturevine compared to the average men's potency supplement! That's 2000% more erection boosting power in every dose of Big Bubba!

Too much is not enough!

Rounding out our formulation is a basket of essential herbs and nutraceuticals that are essential for peak male health and sexual function....

L-Arginine: One of the most popular ingredients for the treatment of sexual fatigue and performance loss anywhere. L-Arginine relaxes the blood vessels in your penis allowing

Time to bring out the big guns!

In WWII, when the Germans needed to cross a heavily contested battlefield without getting their butts handed to them, they brought out Big Bertha...

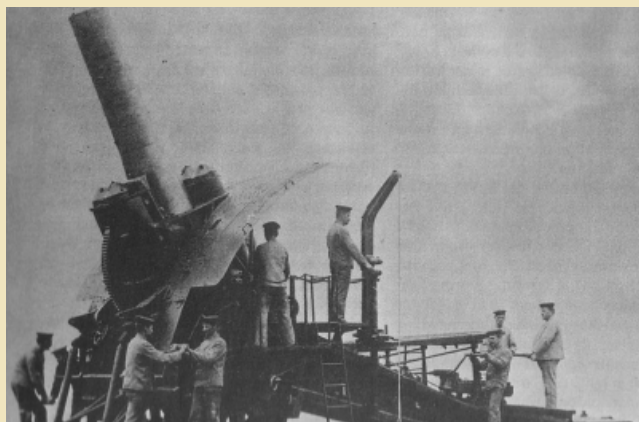

It was a bigger gun — shot bigger bullets — at a higher rate of speed than any other weapon on the battlefield at that time! It was so big you needed two men to fire it effectively.

But more important — it got the job done in a very big way!

Bigger gun = more fire power.

It's almost too simple!

The same is true for Big Bubba...

your member to completely fill with blood,⁴ giving you the longest, thickest, hardest erection you've ever had!

Equally impressive is L-Arginine has been shown to prevent a destructive process in your body, known as cross-linking, which is associated with aging,⁵ confirming what we've known all along — you **can** slow down the onset of old age and Big Bubba helps!

Panax Ginseng: This amazing little herb, known in China as "man root", has been shown over the centuries to increase stamina and boost sexual desire in men,⁶ transforming you from a sexual sprinter to an all-night "marathon man!"

Maca: Your one stop shop for overall robust male health. Maca is a potent aphrodisiac and can greatly increase your desire and capacity for sex.⁷ It keeps you coming back for more when most men half your age are already sleeping!

Zinc: Normal levels of Zinc in men are directly related to healthy semen volume and healthy testosterone levels. It's also one of the most important nutrients for maintaining a healthy functioning prostate,⁸ so you can keep her in ecstasy well past your 100th birthday!

Faster than pills or capsules!

Unlike most male potency supplements, with Big Bubba you don't have to plan your next erection. Waiting 45... 30... even just 15 minutes really kills the moment.

I think you'll agree that taking the spontaneity out of lovemaking is almost as bad as not being able to perform at all. This isn't a dentist appointment you're scheduling here!

Those days are long gone thanks to Big Bubba! With our revolutionary chewable delivery system, there's no more waiting — you'll be able to achieve **monster** erections in minutes.

It dissolves in seconds (nothing for your stomach to digest) and rushes every last nutrient right into your blood stream and straight towards your "manhood".

You'll receive a waterfall of valuable nutrients that will *energize* and *revitalize* your wimpy

erections... so you're ready for action at a moment's notice... day or night!

When's the last time you had...

- Instantaneous rock-hard erections that do the job all night long?
- Massive energy surges that keep you going all day and all night long?
- Boundless confidence and self esteem, leaving you feeling like the *man* of the house again?

Big Bubba is faster than pills or tablets and 1000% more effective! No more waiting around for prescription drugs to kick in. Erections that are hard as steel are just minutes away!

For what you get... it's a great value!

I'm 100% sure Big Bubba is, by far, the best male sexual enhancer *ever*. We've spared no expense to bring you the absolute best erection booster the world has ever seen!

But, acquiring the most potent nutrients, with the highest concentration of their active ingredients, isn't cheap. Some of the key ingredients cost more than gold! Couple that with our new, chewable delivery system and you're looking at the *best* sexual enhancer on the market.

Naturally, it costs a little more... but it's still only about $\frac{1}{10}$ the price of those chemically-formulated male enhancement products. And when it comes to delivering rock-hard erections

Big Bubba has atomic firepower!

When it comes to power, size is *not* the only relevant factor.

Imagine two countries each have a 2,000 lb. bomb. Country #1 has a 2,000 lb. conventional bomb and Country #2 has a 2,000 lb. atomic bomb.

Sure, they're the same size, but they're *vastly* different in their power. Country #1's conventional bomb might take out 300 people, but Country #2's atomic bomb will vaporize a whole city!

This is the kind of difference in the potency of Big Bubba compared to other products on the market.

We doubled and tripled all the dosages to their maximum possible levels. The result is the biggest, most potent erection booster available today, with or without a prescription.

Just **one** monster dose has more than enough *sexual rocket fuel* inside to prepare you for an all night sexual marathon that will have your lover melting under the covers.

and boundless sexual energy... Big Bubba is second to none!

The Best Offer!

Normally, a product with the potency of Big Bubba would have to sell in doctors' offices for at least \$107.13 for 30 tablets. But I was worried that might be too expensive for some seniors living on fixed incomes. I want to make sure that everyone has an opportunity to try Big Bubba at least once. So what I've done is worked out a special deal with our suppliers.

By buying an enormous bulk shipment, I've managed to reduce the price by almost 75%. The only problem is, I have cases of Big Bubba covering my office from ceiling to floor!

So I've come up with a special *risk-free* introductory offer that's going to help us both. I'll get the use of my office back and you get to take advantage of some amazing savings.

Just call my office today and I'll send you 2 bottles (60 tablets) of Big Bubba for the super-low introductory price of \$59.95... a savings of \$154.31!

That's less than the cost of a single bottle of

Over, please...

Big Bubba if you purchased it at your doctor's office! All I ask in return is that you jump on this offer today so that I can use my office again!

And remember, with all NatureCast products, your satisfaction is always 100% unconditionally guaranteed! Whether it's after your first dose, or 3 months from now, if you're not absolutely blown away by Big Bubba, I don't want to keep a dime of your money!

Just send back **any** unused portion of your order and we'll send you a full refund of your purchase price, no questions asked.

Do it for your lover... Hell, do it for You!

So what are you waiting for? It only takes one dose and a few minutes to change your life forever. Don't let past failure keep you from getting back into the swing of things.

I think you owe it both of you to try Big Bubba today. There's absolutely no risk on your part and your satisfaction is 100% Guaranteed!

So don't dilly-dally. Even with this bulk shipment, I still expect these bottles to run out in about 7 to 13 days. And after that I can't guarantee I'll be able to offer this super-low introductory price again.

Between patients, my current clients, friends and family members, this stuff goes quick! So don't delay — give us a call today and secure your 1, 2 or 6 month supply.

Regards,

Larry Berman
President, NatureCast

PS — I'm **never** going to make an offer this good again! My office just can't handle these over-sized shipments. So I highly recommend buying at least a 6-month supply while the price is right.

Call (877) 899-8541, fax it to (352) 377-4379 or send it to us in the enclosed envelope. Place your order **today!**
