How To Profit from the Biggest Cancer Breakthrough Since 1973

This special report will give you all the details about the company that's developed the biggest cancer breakthrough since 1973. It's not a "cure" for cancer but a tremendous breakthrough that allows patients to live with cancer—to control it in the same way that people who live with heart disease carry on normal, active lives after having a heart attack. It's a powerful "maintenance" drug that's already passed FDA approval. While brokers and money managers are anxious to invest in companies touting a cure for cancer, they haven't taken notice of the company that has developed this drug. This company's stock is set to soar for those who invest now.

340% Profits on the Best Asset Class of the Last Ten Years

Let just a small portion of your portfolio rescue your financial life. Learn why during the past ten years, emerging market sovereign (government) bonds handily outperformed not only U.S. corporate bonds, but amazingly, the S&P 500 equity index as well. And how you should be able to beat the historic 340% return during the coming years when this sector really heats up.

The Two Most Profitable Secrets of The World's Greatest Investors

There's a reason *Oxford Club* members were one of the few investors to escape the tech crash with profits as high as 906% in hand. It's because—like all investors who enjoy long-term success—we employ the two most important investing techniques any investor can know: "trailing stop losses" and "position sizing." This report spells out—in a clear and easy-to-follow manner—the most powerful strategies for squeezing every penny from your winners...and ensuring you never lose your shirt in another investment, ever again.

Momentum Investing: Know When A Stock Is About to Soar!

Microsoft was one. So was Home Depot, America Online and PeopleSoft, to name a few. They're known as "Momentum Stocks"—stocks whose prices experience a meteoric rise in a very short period of time. But what most investors don't know is that momentum stocks display certain traits right before they make their biggest gains. In fact, had you bought every stock over the past two decades that passed two simple tests you would have beaten the S&P 500 return by as much as 58%! This important special report tells what those two simple tests are—and other ways to know when a stock is in the earliest stages of explosive growth. A must read for any serious investor!

The Income Trader: The Low Risk Way to Supercharge Your Cash-Account Returns by 200 - 600%

Imagine if you could own a \$12 stock for \$9...a \$27 stock for \$22...or a \$47 stock for just \$36. Think of the advantage you'd have! You'd already have your profits in hand. And if the stock price fell, you'd have a substantial "cushion" before the loss affected you. Remarkably, you do buy stocks cheaper than everyone else when you use The Income Trader System. This special report tells you how to do it—and reveals a very powerful strategy that has enabled *Oxford Club* members who use it to have profited on 74 out of 84 trades since the strategy was introduced back in 1999. If you're looking for safe, market beating profits, don't miss a word of this revealing report.

FREE INVESTORS' REPORT #6

Trend Traders—Two Decades of World-Beating Performance with No Market Correlation

The *Oxford Club* prides itself on discovering highly-profitable investments the average investor never sees, such as Trend Traders. Trend Traders invest in managed futures market—an investment used by the world's top pension funds, professional investors and corporations—and one with almost no correlation to the stock market. Over the last 20 years, Trend Traders have earned annualized profits of 15.5% and had only three, short down periods. More importantly, during the market meltdown of 2000–2002, when the average U.S. stock fund shed 35%, Trend Traders were able to take profits anywhere from 50% to 100%. With this report, you'll learn what you need to know to start profiting alongside the big guys.

99 Stocks To Avoid At All Costs

Avoiding losers is perhaps more important than picking winners. Are any of these stinkers in your portfolio, or in the mutual funds you own? Don't miss this report that lists 99 stocks we believe will tank in the next 12 to 24 months because of a fundamental financial or operational weakness, under-funded pension obligations, excessive stock options, impending legal problems or competitive disadvantages.

Your satisfaction is guaranteed. If at any time the Club fails to live up to your expectations, or fails in its commitment to you, you are entitled to withdraw your membership and receive a full refund of the balance of your membership fees.
